53-00-00 - Description - Fuselage

1. General

- A. This Chapter contains data about the structural components of the fuselage.
- B. The fuselage has the usual skin, stringers and frame construction. This does not include the nose section which has frames at a decreased pitch and no stringers.
- C. Most areas of the fuselage are pressurized. This does not include:
 - The radome,
 - The rear fuselage section (aft of FR70),
 - The nose landing-gear bay,
 - The lower section of the center section (Section 15)
- D. The Chapter is divided into five main sections/sub-Systems (XX-1X-XX). These are:
 - NOSE FORWARD FUSELAGE ([Chapter 53-10-00](#)),
 - FORWARD FUSELAGE ([Chapter 53-20-00](#)),
 - CENTER FUSELAGE ([Chapter 53-30-00](#)),
 - REAR FUSELAGE ([Chapter 53-40-00](#)),
 - CONE / REAR FUSELAGE ([Chapter 53-50-00](#)).
 - (1) The five main sections/sub-systems are divided into sub/sub-systems (XX-01-XX).
 - (2) The sub/sub-systems are divided into subject data (XX-XX-01).The table of contents for this chapter lists these subjects.
- E. Each subject is divided into topics. A page block sub-division for each subject identifies each topic. These are:
 - Structural Identification,
 - Allowable Damage,
 - Repairs.
 - (1) Figure [001](#) shows the five main sections of this chapter by frame and station number.
 - (2) Figure [002](#) identifies the main panel and section configuration as manufactured. The nine separately manufactured sections are joined at frame 24, 35, 35.8, 47, 47.5, 64, 70 and 77.
 - (3) Table [1](#), Table [2](#), Table [3](#), Table [4](#), Table [5](#),Table [6](#),Table [7](#), Table [8](#) and Table [9](#) give the grid location by frame and stringer reference of the itemized panel in Figure [002](#).
 - (4) Figure [003](#) shows the fuselage frame and station numbers.

2. Principal Structure Elements (PSE)

- A. Refer to [Chapter 51-11-12](#) for the list of PSE items.
